

Effort versus Performance

Effort Week 1						
Vocabulary Log					Total	0
Percent completed with fidelity and integrity						
Percent completed daily						
Make-up Assignments (if none are due this week, carry over score from previous week)					Total	0
Percent completed						
Percent completed with fidelity and integrity						
Quizlet Learn (if none are due this week, carry over score from previous week)					Total	0
Percent completed						
Completed with fidelity and integrity						
Cornell Notes					Total	0
Turned in on time (100=on time. Subtract 5 for each day late.)						
Percent effort on initial guess						
Percent of notes written from short-term memory as opposed to copied from PowerPoint slide						
Multiple of the following: unanswered higher order thinking questions, topics you want to know more about, and <i>original</i> cues posed in question form (rate yourself on a scale of 0-10 where 10 is your best effort).						
Before writing my summary, I reread my notes checking for understanding and completeness, and gave a complete answer to the title question in 3-5 sentences (rate yourself on a scale of 0-10 where 10 is your best effort).						
Self-directed learning					Total	0
<p>Effort you put into learning Anatomy & Physiology content beyond what you received a grade for. Think about how often you did the following:</p> <ol style="list-style-type: none"> 1) talked about what you are learning with friends and family 2) posed questions to your classmates and teacher 3) reviewed vocabulary that you were not going to be quizzed on within a week 4) reviewed your Cornell notes from units you would not be tested on within a week 5) sought a deeper understanding of concepts covered knowing that this extra understanding would not be tested 6) made connections between Anatomy & Physiology and other subjects you are learning about 7) made connections between Anatomy & Physiology and your life and to society <p>(rate yourself on a scale of 0-10 where 10 is your best effort).</p>
